To Whom It May Concern:

Coal County General Hospital, Inc. is pleased to recommend Eagle Roofing. We employed Eagle Roofing to replace the roof on our hospital. The hospital has a flat roof that was covered with a liner about ten years ago. Wind had blown part of the liner off and the roof was leaking in numerous places. Eagle Roofing removed the liner and had the roof replaced much quicker than we anticipated that it could be done. The roof was replaced for the price quoted with no additional cost and the quality of the work was excellent. We have had several heavy spring rains with no leaks.

Eagle Roofing continues to follow up and check to see if we have had any issues or problems with the new roof. They have proven to me that their company stands behind their product and workmanship. Eagle Roofing exceeded our expectations with the quality and timeliness of the work performed while providing excellent customer service. Based on our experience with Eagle Roofing, I would highly recommend them to others and more importantly use their services again in the future should the need arise.

Sincerely,

Billy Johnson
C.O.O.
